Objectives

- The course in Advances in Microeconomics and Macroeconomics explores issues of microeconomics and macroeconomics not analyzed in the basic courses, with a particular focus on topics related to economic growth, inequality and the role of institutions.
- The course has a twofold objective:
 - Gain an in-depth knowledge of economic issues (microeconomic and macroeconomic);
 - Know and understand the determinants of economic growth, the functioning of international markets and economic policy choices.

Course Evaluation

- Learning will be assessed via students' drafting and presentation of short essays based on reading and studying materials provided by the instructor.

Students will be asked to:

- prepare a power point presentation (alone or in couple) on a specific topic/paper agreed with the instructor (50% of the final mark);
- prepare a short essay including the following sections: introduction to the topic, review of the literature, summary of the paper agreed with the instructor, conclusions (50% of the final mark).
