BIOLOGY OF GAMETES: OBJECTIVES Post-natal life Foetal life (pre-puberal and adult life) Primary Secondary Tertiary Small Antral Tertiary Ovulated Primordial Primordial germ cells/oogones O CM 0 30 0 30 Follicle Oocyte Prophase I PGC Entry into meiosis Growth phase Maturation phase differentiation migration Foetal oogenesis Post-natal oogenesis **OVERVIEW ON THE OOGENESIS**

Structural and biochemical modifications during oogenesis

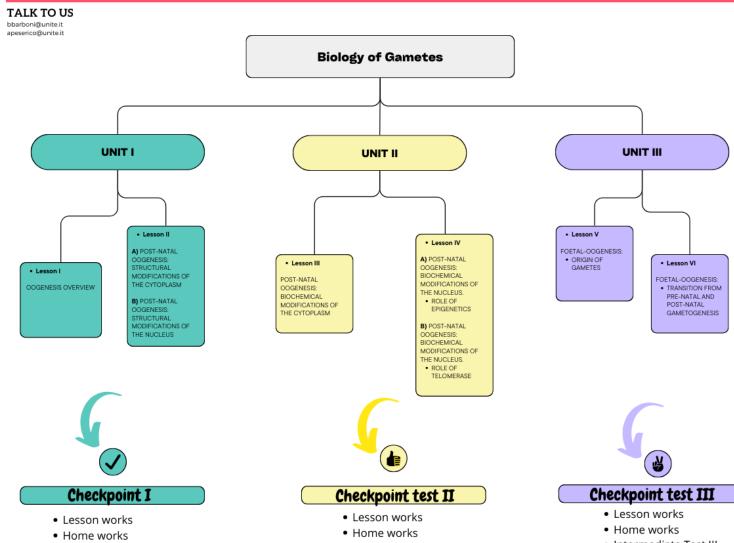

TIMIMG
When modifications
occur?

To what extent the various phases of oogenesis affect female fertility by influencing the ultimate events of fertilization and blastocyst formation?

Biology of gametes and techniques of IVM and IVF

LESSON and HOME WORKs

Teamwork to consolidate lesson concepts

INTERMEDIATE TEST

Multi-choice questionnaire

• Intermediate Test I

Intermediate Test II

• Intermediate Test III

Peer assessment and Peer feedback

PEER ASSESSMENT

Discussion about an original research paper related to the course objectives

COURSE TIME SHEET

LESSONS and HOME/LESSON WORKS

A unit each week Lesson works accomplished in the classroom Home works will be assigned at the end of each unit.

TO PASS THE COURSE

- **3 intermediate tests passed and accepted:** the avarage score obtained will be sufficient for grading.
- One out of the intermediate tests does not meet the minimum passing threshold: you have one attempt to retake the unsuccessful test.
- One out of the intermediate tests is not passed twice, or the obtained score is rejected twice: a comprehensive test covering all course units must be taken.

The same applies if the intermediate tests have not been taken.

TIMING FOR THE INTERMEDIATE TESTS

You will have one week to study each unit before taking the intermediate test.

INTERMEDIATE TESTS SCORE

- The average of the scores from the three intermediate tests will constitute the final grade, which will then be averaged with that of Prof. Gioia's module.
- -The peer-to-peer presentations, if successfully passed, would improve the final grade by a maximum of 3 points.
- (1 = basic, 2 = good, 3 = excellent).

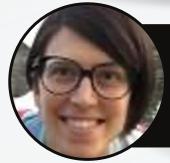

THEORETICAL SESSIONS

Barbara Barboni

Full Professor in Physiology, MVD, PhD Head of the Unit of Physiology and Anatomy Contact:

bbarboni@unite.it

Alessia Peserico

RTD-B in Physiology, PhD Contact:

apeserico@unite.it

Giulia Capacchietti

Senior Lab Technician of the Physiology unit Contact:

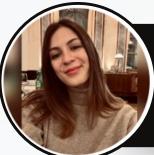

gcapacchietti@unite.it

Chiara Di Berardino

Post-DOC in Physiology, PhD Contact:

cdiberardino@unite.it

Chiara Camerano Spelta Rapini

PhD Student in Physiology Contact:

ccameranosr@unite.it
