

Statistics and laboratory data analysis

UNITE, Anatomy/Physiology Meeting Room, 4th level Building GIUR

Calendar	Content	Schedule	Professor
18.09.17	<ul style="list-style-type: none"> • Probability: Definitions of probability • Calculation in operative conditions • Conditioned probability 	9:00-12:00 14:00-16:30	N. Bernabò
19.09.17	<ul style="list-style-type: none"> • Descriptive statistic: Concept of distribution • Different kind of distributions • Normality tests 	9:00-12:00	N. Bernabò
20.09.17	<ul style="list-style-type: none"> • Inferential statistic: Parametrical and non-parametrical tests for two samples or for more samples • Practical session 	9:00-12:00 14:00-16:00	N. Bernabò
25.09.17	<ul style="list-style-type: none"> • Concept of correlation and regression: Linear and non-linear regression, multiple regression. • Introduction to multivariate techniques 	9:00-12:00 14:00-16:30	N. Bernabò
26.09.17	<ul style="list-style-type: none"> • Grouping and clustering 	9:00-12:00	N. Bernabò
